DETAILED ACTION

The amendment received on December 28, 2005 is acknowledged.

This case has been transferred to a new examiner. A telephone call was made to Leslie I. Bookoff on March 13, 2006 in which it was explained that the application is subject to a restriction requirement.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-24, drawn to a tissue patch, classified in class 424, subclass 423.
- II. Claims 25-36, drawn to a method for treating a lesion, classified in class 623, subclass 1.13.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the tissue patch can be used to treat something other than a lesion and can be used either outside or inside the body.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their

different classification, restriction for examination purposes as indicated is proper.
